PROFESSIONAL SUMMARY

Junior Flutter Developer with hands-on experience building 6 complete cross-platform mobile applications using Flutter and Dart. Skilled in Clean Architecture, Bloc/Cubit, Provider, REST API integration with Dio, Firebase Authentication, Firestore, local storage, responsive UI, and reusable widgets. Currently training at the National Telecommunication Institute (NTI) and seeking Flutter internship or Junior Flutter Developer opportunities.

EXPERIENCE

Flutter Developer Trainee

Mar 2026 - Present

National Telecommunication Institute (NTI) - Beni-Suef, Egypt

- Built and delivered 6 complete Flutter applications and additional practice projects from scratch using feature-based structure and Clean Architecture principles.
- Consumed RESTful APIs using Dio, implementing interceptors for error handling, token management, API response handling, and network state feedback.
- Managed application state using Bloc, Cubit, and Provider to handle loading, success, error, and empty states with predictable UI behavior.
- Integrated Firebase Authentication and Firestore to support secure login flows and backend data workflows.
- Created 20+ reusable Flutter widgets and shared UI components, reducing repeated UI code and improving consistency across projects.

PROJECTS

News App

GitHub: https://github.com/rimonnnn/news_app

Stack: Flutter | Dart | Cubit | Dio | REST API | GoRouter | Localization | Responsive UI

- Built a real-time news application that allows users to browse categorized headlines, search articles by keyword, and view article details using a public news API.
- Applied Cubit state management to handle loading, success, error, and empty states in a predictable and maintainable way.
- Integrated Dio for API requests with reusable widgets, clean routing using GoRouter, localization support, and responsive screens.

Meals App

GitHub: <https://github.com/rimonnnn/meals-app->

Stack: Flutter | Dart | Clean Architecture-Inspired | SharedPreferences | Local Data

- Built a meals browsing application that lets users explore meals, view details, filter content, and manage favorite meals during the app session.
- Used SharedPreferences to persist onboarding state and ensure onboarding appears only on the first app launch.
- Structured the project with a Clean Architecture-inspired separation without a dedicated domain layer for better organization and maintainability.

Finance Dashboard App

GitHub: <https://github.com/rimonnnn/financeApp>

Stack: Flutter | Dart | Provider | Custom Widgets | Responsive UI

- Built a responsive finance dashboard UI that provides users with a clear financial overview across screen sizes.
- Used Provider for lightweight state management and cleaner separation between UI updates and business logic.
- Built modular reusable components including stat cards, chart-style UI sections, bottom navigation, and responsive layouts.

TECHNICAL SKILLS

Mobile Development: Flutter SDK, Dart, Material Design, Responsive UI, Reusable Widgets

State Management: Bloc, Cubit, Provider

APIs & Backend: RESTful APIs, Dio, JSON, API Integration, Firebase Authentication, Firestore

Architecture: Clean Architecture, MVVM, SOLID Principles, Feature-Based Structure, Clean Code

Storage & Packages: SharedPreferences, Secure Storage, GoRouter, Easy Localization, Cached Network Images

Tools & Workflow: Android Studio, VS Code, Postman, Git, GitHub, Figma, Debugging, Error Handling

EDUCATION

B.Sc. in Computer Science & Artificial Intelligence

2023 - Expected 2027

Faculty of Computers and Artificial Intelligence - Beni-Suef, Egypt

TRAINING & CERTIFICATIONS

- Flutter Developer Trainee - National Telecommunication Institute (NTI), Mar 2026 - Present
- Mobile Development Bootcamp (Flutter) - Sprints & Microsoft, 2025
- Flutter & Dart Development - Udemy, 2024
- Additional Flutter Course - Udemy, Certificate Pending
