PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building 10+ cross-platform mobile applications using Flutter and Dart. Focused on writing production-ready, scalable code through Clean Architecture, Bloc/Cubit and Provider state management, REST API integration via Dio, and Firebase. Currently training at the National Telecommunication Institute (NTI) and seeking a Flutter internship to contribute to a professional engineering team.

TECHNICAL SKILLS

Languages: Dart

Frameworks: Flutter

State Management: Bloc, Cubit, Provider

Backend & APIs: REST APIs, Dio, Firebase Authentication, Firestore

Storage: SharedPreferences, Secure Storage

Architecture: Clean Architecture, MVVM, SOLID Principles

Tools: Git, GitHub

EXPERIENCE

Flutter Developer Trainee

Mar 2026 - Present

National Telecommunication Institute (NTI) - Beni-Suef, Egypt

- Built and delivered multiple Flutter applications from scratch, following Clean Architecture with clear separation between data, domain, and presentation layers.
- Consumed RESTful APIs using Dio, implementing interceptors for error handling, token management, and network state feedback across app screens.
- Managed application state using Bloc and Cubit patterns, ensuring predictable UI behavior and testable business logic.
- Integrated Firebase Authentication and Firestore to support secure user login and backend data workflows.
- Developed a reusable widget library adopted across multiple projects, improving consistency and reducing repeated code.

PROJECTS

News App

GitHub: https://github.com/rimonnnn/news_app

Stack: Flutter | Dart | Cubit | Dio | REST API

- Built a real-time news application that lets users browse categorized headlines and search articles by keyword through a public news API.
- Applied Cubit state management to handle loading, success, error, and empty states in a predictable and maintainable way.
- Integrated Dio for API requests and structured the project with reusable widgets, clean routing, localization support, and responsive UI.

Meals App

GitHub: <https://github.com/rimonnnn/meals-app>

Stack: Flutter | Dart | Clean Architecture | Local Data

- Lets users browse, filter, and save favorite meals with local data handling for a smooth offline-friendly experience.
- Structured with Clean Architecture to separate data sources, repositories, and UI for long-term maintainability.

Finance Dashboard App

GitHub: <https://github.com/rimonnnn/financeApp>

Stack: Flutter | Dart | Provider | Custom Widgets | Responsive UI

- Provides users with a clear financial overview through a responsive dashboard that adapts across screen sizes.
- Used Provider for lightweight state management and cleaner separation between UI updates and business logic.
- Built modular, reusable components including stat cards, chart placeholders, and bottom navigation.

EDUCATION

B.Sc. in Computer Science & Artificial Intelligence

2023 - Expected 2027

Faculty of Computers and Artificial Intelligence - Beni-Suef, Egypt

TRAINING & CERTIFICATIONS

- Flutter Developer Trainee - National Telecommunication Institute (NTI), Mar 2026 - Present
- Mobile Development Bootcamp (Flutter) - Sprints & Microsoft, 2025
- Flutter & Dart Development - Udemy (x2 courses), 2024
