### PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building 10+ cross-platform mobile applications using Flutter and Dart. Focused on writing production-ready, scalable code through Clean Architecture, Bloc/Cubit state management, and REST API integration via Dio and Firebase. Currently training at the National Telecommunication Institute (NTI) and seeking a Flutter internship to contribute to a professional engineering team.

### TECHNICAL SKILLS

**Languages:** Dart

**Frameworks:** Flutter

**State Management:** Bloc, Cubit

**Backend & APIs:** REST APIs, Dio, Firebase (Authentication, Firestore, FCM)

**Storage:** Hive, SharedPreferences, Secure Storage

**Architecture:** Clean Architecture, MVVM, SOLID Principles

**Tools:** Git, GitHub, CI/CD

### EXPERIENCE

#### Flutter Developer Trainee

Mar 2026 – Present

National Telecommunication Institute (NTI) - Beni-Suef, Egypt

- Built and delivered multiple Flutter applications from scratch, following Clean Architecture with clear separation between data, domain, and presentation layers.
- Consumed RESTful APIs using Dio, implementing interceptors for error handling, token management, and network state feedback across app screens.
- Managed application state using Bloc and Cubit patterns, ensuring predictable UI behavior and testable business logic.
- Integrated Firebase Authentication and Cloud Messaging (FCM) to support secure user login and real-time push notifications.
- Developed a reusable widget library adopted across multiple projects, improving consistency and reducing repeated code.

### PROJECTS

#### News App

GitHub: [https://github.com/rimonnnnn/news\\_app](https://github.com/rimonnnnn/news_app)

Stack: Flutter | Dart | Cubit | Dio | REST API

- Gives users instant access to categorized, real-time news by consuming a public news API through Dio.
- Managed UI states (loading, error, success) using Cubit, ensuring a predictable and smooth user experience.
- Supports pull-to-refresh and pagination for continuous, up-to-date article browsing.

#### Meals App

GitHub: <https://github.com/rimonnnnn/meals-app>

Stack: Flutter | Dart | Hive | Clean Architecture

- Lets users browse, filter, and save favorite meals fully offline using Hive for local data persistence.
- Structured with Clean Architecture to separate data sources, repositories, and UI for long-term maintainability.

#### Finance Dashboard App

GitHub: <https://github.com/rimonnnnn/financeApp>

Stack: Flutter | Dart | Custom Widgets | Responsive UI

- Provides users with a clear financial overview through a responsive dashboard that adapts across screen sizes.
- Built modular, reusable components including stat cards, chart placeholders, and bottom navigation.

---

## EDUCATION

**B.Sc. in Computer Science & Artificial Intelligence**

2023 – Expected 2027

Faculty of Computers and Artificial Intelligence - Beni-Suef, Egypt

---
