Summary

Junior Mobile Developer (Flutter) with experience in Dart, REST API integration, state management, and building responsive mobile applications; seeking an internship to apply clean code principles and contribute to scalable app development.

Work Experience

Mobile-Development Trainee at National Telecommunication Institute (NTI) March 2026 – present offline

- Developed mobile applications using Flutter and Dart, applying OOP, SOLID principles, and clean architecture for scalable and maintainable code.
- Implemented state management, RESTful API integration using Dio, and Firebase services for backend functionality.
- Utilized local storage solutions (SharedPreferences, secure storage) and built responsive UI with animations for enhanced user experience.

Mobile-Development Trainee at CodeAlpha October 2025 – January 2026 online

- Online Training Participant | CodeAlpha - Completed online training in mobile development fundamentals and practical project development, gaining hands-on experience in core programming concepts and real-world application workflows

Education History

Faculty of Computers and Artificial Intelligence, 2023 – present

Technology Skills

Dart | Flutter | OOP | SOLID | Design Patterns | Problem Solving | Firebase | Bloc | Dio | Hive | Secure Storage | Clean Architecture | MVVM | Dependency Injection | Git | GraphQL | WebSockets | Payment | FCM | CI/CD | Local Notifications | Background Services | Native Home Widgets | Flavors | Cubit | Unit & integration testing |

Soft Skills

Adaptability | Communication | Compromise | Creative Thinking | Dependability | Leadership | Listening | Work Ethic | Teamwork | Positivity | Time Management

Projects

1. Meals App

- Developed a Flutter-based mobile application using local storage for data persistence, with organized UI, navigation flow, and structured state handling to ensure a smooth and responsive user experience.
